

iland disaster recovery services with Zerto

Cloud-based disaster recovery has become an optimal option for almost any enterprise that wants to protect its digital assets. But every cloud is not what it seems. Expertise and experience are key to a successful DR plan.

what is iland disaster recovery services with Zerto?

iland integrates with Zerto to provide cloud-based Disaster-Recovery-as-a-Service that replicates data at the hypervisor-level using any type of storage.

This enables you to keep an up-to-date copy of your virtualized applications in iland’s cloud, recovering them as needed on a self-service basis.

iland disaster recovery services with Zerto offers increased flexibility and boosts your ability to recover data fast with a near-zero Recovery Time Objective (RTO). It also offers automated failover and failback that ensures the accuracy and efficiency of your disaster recovery plan.

why choose iland DR services with Zerto? expertise bar none

There is no silver bullet for disaster recovery because every organization has different DR objectives. We have years and years of disaster recovery experience under our belt. We’ve worked with numerous customers to build seamless, cloud-based disaster recovery plans that work for their specific DR objectives, balancing cost with risk tolerance to build the right solution. iland is recognized by analysts as a trusted leader in cloud-based disaster recovery.

accelerate recovery time

Following a disaster, you typically need to recover all your data before you can access it. iland disaster recovery services with Zerto is different. Using a process known as journaling, you can seamlessly access data while it is being failed over to your recovery site in iland’s cloud, enabling your business to recover significantly faster in the event of a disaster.

iland CCS with Zerto at a glance

- ✓ Unsurpassed expertise to create a DR plan that fits YOUR business
- ✓ Near-zero recovery time objective (RTO)
- ✓ Self-service testing at any time
- ✓ Radically improved control over your disaster recovery plan
- ✓ Network-layer flexibility
- ✓ Support for legacy systems
- ✓ Familiar VMware operating environment

Why choose iland?

- ▶ 18+ years supporting customers and their critical workloads
- ▶ 95%+ customer satisfaction rating for iland Cloud Support – with representatives at each cloud location
- ▶ 7 global data centers in NA and EMEA, with growth plans in EMEA & APAC
- ▶ 3 VMware Partner network awards Americas & Global
- ▶ Consultative customer relationships with the flexibility to meet your business needs

“One of the biggest strengths of iland’s continuity cloud offering is its immense flexibility across recovery objectives, data transport technologies, supported platforms, and even the management and support. Yet somehow, it manages to keep its solution from becoming overly complex and overly customized. In fact, its pricing transparency, service levels, and contract terms received very high marks from customers.”

“The Forrester Wave™: Disaster-Recovery-As-A-Service Providers, Q1 2014,” Forrester Research, Inc., January 17, 2014.

You can accelerate recovery time further with Integrated Network Compression. This speeds up replication by reducing the amount of data being replicated and reduces your WAN bandwidth requirements.

test your dr plan at any time

The only surefire way to ensure your disaster recovery plan will work in the event of real disaster is to test it on a regular basis. With iland DR services with Zerto you get self-service test, failover and assisted failback that gives you the flexibility to test your disaster recovery plan whenever you like, as many times as you like.

network layer flexibility

The network plays a vital part in ensuring rapid recovery from a disaster. iland provides a range of configuration options from preconfigured failover networking and flexible internal and external IP configuration options to co-location of physical equipment.

You also get redundant, high speed, low latency connectivity to Tier 1 providers and can connect directly to hundreds of carriers through iland CloudConnect using point-to-point and MPLS connections.

don't forget your legacy systems

We can accommodate and co-locate legacy and physical systems that can be seamlessly incorporated into your disaster recovery plan.

and, the rest of the reasons

There are a host of other reasons to choose iland – and we'd love to highlight just a few more:

- Build virtual machines to any CPU, RAM, or storage specification required.
- Our US locations hold SSAE 16 certification. Our EMEA locations hold ISO 9001/27001 certifications
- Data is encrypted as it travels across the wire using AES-256 encryption

so, what's next?

about iland

With data centers in the U.S. and U.K., iland delivers proven enterprise cloud solutions that help companies do business faster, smarter and more flexibly. Unlike any other provider, iland's technology and consultative approach mean anyone—regardless of expertise, location or business objective—can experience the benefits of a hassle-free cloud.

From scaling production workloads, to supporting testing and development, to disaster recovery, iland's secure cloud and decades of experience translate into unmatched service. Underscoring the strength of its platform, the company has been recognized as VMware's Service Provider Partner of the Year, Global and Americas.

about Zerto

Zerto

Zerto provides enterprises with data replication and recovery designed specifically for virtualized infrastructure and the cloud. Zerto Virtual Replication is the industry's first hypervisor-based replication solution for tier-one applications, replacing traditional array-based BC/DR solutions that were not built to deal with the virtual paradigm.
