

Cisco Cloud Services Router 1000V

iland customers can now experience the advantages of enterprise class networking on their deployed cloud services with a full featured virtual routing platform

cloud networking made easy

The Cisco Cloud Services Router 1000V (CSR) is a fully virtualized software router that is deployed in the iland secure, global data centers. The solution enables customers to extend a WAN to the iland Secure CloudSM and supports delivery of enterprise-class networking with rapid deployment and flexibility. The iland cloud platform combined with Cisco CSR enables customers to more easily move apps and workloads to the iland cloud and decreases barriers to adoption of a hybrid cloud model.

familiar and powerful networking

The Cisco CSR uses the familiar enterprise class Cisco IOS-XE operating system for consistent network operation and delivers a rich set of networking features including dynamic routing, advanced VPN, zone-based firewall, Quality of Service (QoS), network-based application visibility, and first-hop routing redundancy.

Cisco CSR enables customers to optimally access their cloud deployed applications with direct connectivity to the iland Secure Cloud from distributed sites and delivers improved app response time and user experience. The solution also provides increased network security and consolidates network functions resulting in less administration.

deployment and availability

The Cisco CSR solution from iland is available in the following throughputs:

- 100 Mbps
- 250 Mbps
- 500 Mbps
- 1 Gbps
- 2.5 Gbps

help along the way

iland's team of cloud experts will help deploy and configure Cisco CSR, recommending configurations and testing connectivity. Once deployed, our support team will be happy to advise and help you at any time.

so, what's next?

Reach out to iland to learn more about our secure cloud offerings, and how we can help your business grow.

why choose iland

- 20+ years supporting customers and their critical workloads
- 97%+ customer satisfaction for technical support
- 8 global data centers in NA, EMEA and APAC with further growth plans
- Consultative, flexible customer relationships
- Leader – Gartner Magic Quadrant for DRaaS 2016 & 2017
- Leader – Forrester Wave for DRaaS Providers 2014 - 2017

about iland

iland is a global cloud service provider of secure and compliant hosting for infrastructure (IaaS), disaster recovery (DRaaS), and backup as a service (BaaS). They are recognized by industry analysts as a leader in disaster recovery. The award-winning iland Secure Cloud ConsoleSM natively combines deep layered security, predictive analytics, and compliance to deliver unmatched visibility and ease of management for all of iland's cloud services. Headquartered in Houston, Texas and London, UK, iland delivers cloud services from its data centers throughout the Americas, Europe, Australia and Asia. Learn more at iland.com.
