

PROTECT

Mind the gaps in your data protection with 11:11 Cloud Backup for Microsoft 365.

MICROSOFT 365

Make sure your Microsoft 365 data is safe and secure with dedicated, cloud-to-cloud backup.

You may not realize it, but protecting Microsoft 365 data is a shared responsibility. Microsoft is accountable for making sure the application and infrastructure are all working—but the actual data protection falls squarely with your organization. If you aren't protecting your 365 data, you may be leaving your business vulnerable to cybercriminals.

Eliminate the retention gap with 11:11 Cloud Backup for Microsoft 365. We can help you protect valuable 365 data, such as emails, contacts, and files in Exchange, SharePoint, Teams, and OneDrive. Now you can be prepared to address ransomware, insider attacks, and other disasters. The right cloud-based backup solution helps you eliminate Microsoft 365 data retention and business continuity issues while also addressing compliance and legal requirements.

Protect your business data with comprehensive, cloud-to-cloud backup.

11:11 Cloud Backup for Microsoft 365 leverages Veeam's industry-leading software to give you unparalleled protection of your 365 environment. Our joint solution provides you with cloud-to-cloud backup with less complexity and greater data control and management.

11:11 Cloud Backup for Microsoft 365 gives you control of your productivity data.

Key Benefits:

- Automatic or customized backups of 365 data
- Protection for all SharePoint, Exchange, Teams, and OneDrive data
- Straightforward, per user/mailbox pricing
- Unlimited storage and retention
- Central management via the award-winning 11:11 Cloud Console
- Expert 24x7x265 support included

Many Ways to Recover:

- Restore Exchange, SharePoint, OneDrive, and Teams data
- Export objects to a Personal Storage Table (.pst) file
- Save mailbox items as a Microsoft Outlook (.msg) file
- Send items as attachments to specific recipients
- Download individual objects as files or groups of objects as a .zip file

No matter where your data is, security is essential.

11:11 Cloud Backup for Microsoft 365 is an important part of securing your data in the cloud. If users accidentally or deliberately delete data, a malicious employee misuses privileges, someone hits your organization with a ransomware attack, complete and cost-effective M365 backup will save the day. You're also covered if your industry or government requires you to archive your data for future access.

Trust industry leaders to protect Microsoft 365 data.

Both Veeam and 11:11 Systems are industry leaders in data protection. That's why you can count on us to secure your M365 data. With 11:11 Cloud Backup for Microsoft 365 you can ensure your valuable productivity data can be recovered when you need it.
