

Relax, it's backed up

Information is a key business driver and its availability is what makes you successful. Today and every day, your data is at risk whether from cybercriminals, internal threats, employee error or equipment malfunctions. The cost of downtime runs into several thousands of dollars per hour. Backup as a Service (BaaS) enables you to protect, locate, and recover more

information in less time, across all platforms, locations, and storage environments from a central management location. The agility of cloud can give you the flexibility to adjust when real-world data growth exceeds what you planned for years earlier. BaaS can offer you the security and flexibility in the event of the unexpected.

Eliminate Data Loss

iland Secure Cloud Backup™ with Veeam Cloud Connect offers a simple and cost-effective cloud solution for your offsite backup and archiving needs. iland provides direct integration and 100 percent compatibility with Veeam's industry-leading backup and replication software. Our secure cloud allows you to maintain air-gapped protection and adhere to the best-practice 3-2-1 rule of data availability.

Convenience and scalability like never before

iland's global cloud platform provides the automation and orchestration necessary to protect your critical business workloads with the peace of mind that comes from our ability to meet your offsite backup and archiving goals from design through to implementation. This combined with our focus on security, compliance, flexibility and reporting has established iland as the cloud platform of choice.

Intuitive Cloud management

The success of your cloud is reliant on the ease of managing all the necessary components. Easily manage all of your virtual data center resources, view detailed performance information, access granular billing information and more with our iland secure cloud console.

Easy, convenient, affordable and secure

- Straight-forward consumption model
- All-inclusive support 24x7x365
- Reliable restore
- Integrated security

Cloud backup doesn't have to be complex and time-consuming

Proceed with confidence—ease of implementation to on-going support

- Expert advice
- Fast recovery times
- Straightforward pricing
- On-demand testing
- Visibility and control
- Industry leaders
