

# iland Secure DRaaS with

iland Secure DRaaS<sup>SM</sup> with Veeam integrates your on-premise Veeam Management platform with an extension to the cloud providing secure and robust replication & failover capabilities. Complementing iland's Veeam Cloud Connect Backup service, this option enables customers to quickly configure both services, select which VMs to protect with backup and DR failover capabilities as needed.

With years of experience in deploying disaster recovery for hundreds of customers, iland provides a true partnership for customers using a comprehensive methodology delivered by our experienced team of engineers helping to design and implement a DR plan that fits your organization's needs.

## Why Choose iland Secure DRaaS with Veeam?

### Key Benefits & Features:

- > Centralized management & reporting using iland's **Secure Cloud Console**
- > Integrated orchestration of Disaster Recovery Runbooks for live & test failover
- > Self-service or assisted onboarding and failover using iland's **Recovery Assurance**
- > Optional colocation for supporting legacy systems and hardware platforms
- > Purpose-built solution offering 100% compatibility with Veeam's Cloud Connect technology
- > Powered by iland's award-winning **Secure Cloud** infrastructure with 100% uptime SLAs

### Confidence built on a comprehensive security & compliance framework:

- > Built-in UTM features including anti-virus, malware, vulnerability scanning & IDS
- > Comprehensive reporting for ISO, SOC2, HIPAA and more
- > Granular access control with built-in Identity Access Management
- > Integrated data-at-rest encryption or optional per-VM encryption

### Software-defined networking for maximum flexibility:

- > Integrated core networking services for firewall, routing, load-balancing and more
- > Support for IPSEC VPN or dedicated circuits
- > Support for hybrid or multi-cloud connectivity options with MegaPort™
- > Built-in external DNS management

### A trusted partner you can depend on:

- > 24x7x365 exceptional customer support with in-region phone support from certified iland technicians
- > On-demand emergency option for fully-managed failover during a live disaster

### Operated on world-class data centers & infrastructure

- > Geographic diversity with locations across the Americas, Europe, Australia, and Asia
- > Stringent compliance operating under HIPAA, SOC2, ISO 27001, GDPR and more
- > Cloud Security Alliance STAR Gold Certification
- > Fully redundant enterprise-class infrastructure built on leading-edge technologies
