

Streamline your entire data protection experience with a single, unified management interface.

iland Secure DRaaS with Veeam integrates the leading solution for backup, disaster recovery and hyper-availability with iland Secure Cloud. This integration delivers peace of mind with complete visibility into your DR environment and control over your entire resilient data protection platform.

With years of experience in deploying disaster recovery solutions, iland provides a true partnership for customers using a comprehensive methodology delivered by our experienced team of engineers helping to design and implement a purpose-built DR plan that achieves your business objectives.

Key benefits

- Centralized management and reporting using iland Secure Cloud Console
- Integrated orchestration of Disaster Recovery Runbooks for live and test failover
- Self-service or assisted onboarding and failover using iland Recovery Assurance
- Optional colocation for supporting legacy systems and hardware platforms
- Purpose-built solution offering 100 percent compatibility with Veeam Cloud Connect technology
- Powered by the award-winning iland Secure Cloud infrastructure with 100 percent uptime

Comprehensive security and compliance framework

- Built-in UTM features including anti-virus, malware, vulnerability scanning and IDS
- Comprehensive reporting for ISO, SOC2, HIPAA and more
- Granular access control with built-in Identity Access Management
- Integrated data-at-rest encryption or optional per-VM encryption

Enterprise-class infrastructure

- Fully redundant enterprise-class infrastructure built on leading-edge technologies
- Geographic diversity with locations across the Americas, Europe, Australia, and Asia
- Stringent compliance operating under HIPAA, SOC2, ISO 27001, GDPR and more
- Cloud Security Alliance STAR Gold Certification

Flexible software-defined networking

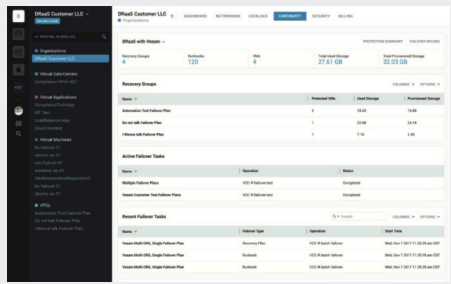

- Integrated core networking services for firewall, routing, load-balancing, and more
- Support for IPSEC VPN or dedicated circuits
- Support for hybrid or multi-cloud connectivity options with MegaPort™
- Built-in external DNS management

Trusted partner you can depend on

- 24x7x365 exceptional customer support with in-region phone support
- On-demand emergency option for fully-managed failover during a live disaster

See the big picture and control the details

iland Secure Cloud Backup with Veeam Cloud Connect enables organizations to store VMware backups in our secure, global cloud storage infrastructure. Veeam customers can use the integrated iland Secure Cloud Console to monitor and manage their backup solution through a single pane of glass.
